

REGINAsocks

Branded products of Regina characterized a unique softness and flexibility through the use of professional yarns.

Pressure-free cuffs increase the comfort, directly affecting on the user satisfaction.

Additionally reinforced zones on toes and the heels to lengthen the life of the product.

Available materials:

Combed cotton - soft without impurities, perfect for summer knitwear.

Brushing is a process in which cotton is deprived of impurities, nodes, and short fibers whereby achieves a smooth and supple cotton.

Polyamide, due to its characteristics - lightness, strength, resistance to creasing, easy washing and fast drying is a popular material used for the production of socks. As used in the form of microfibers has a very high flexibility, juiciness of colors and a pleasure to touch.

Material is very resistant to bacteria and fungi.

Elastan (SPANDEX) ensures a perfect fit to any, even the most demanding foot - after stretched is fully deformable.

Additionally, resistant to sweat, fat and detergents, which increases the comfort and quality of Your life.

Thanks to using the **Purista** measure, which allows the control over the development of bacterial flora and the associated odor socks stay fresh for a longer time (up to 50 washes). It gives you confidence and makes the persons wearers of socks with a sign **Purista** will feel clean and surely for a long useful time.

The scale of keeping warm:

Very thin sock, the most common type are sneakers with a very low degree of keeping feet warm.

Thin sock with a low degree of keeping feet warm.

Thickness medium sock, half-terry type with a medium degree of keeping feet warm.
