

# REGINAsocks

Branded products of Regina characterized a unique softness and flexibility through the use of professional yarns.

Pressure-free cuffs increase the comfort, directly affecting on the user satisfaction.

Additionally reinforced zones on toes and the heels to lengthen the life of the product.

## Available materials:

**Bamboo viscoze** has a soft grip, strong ability to absorb and donate moisture, which gives you the perfect thermal comfort.

**Polyamide**, due to its characteristics - lightness, strength, resistance to creasing, easy washing and fast drying is a popular material used for the production of socks. As used in the form of microfibers has a very high flexibility, juiciness of colors and a pleasure to touch. Material is very resistant to bacteria and fungi.

**Elastan (SPANDEX)** ensures a perfect fit to any, even the most demanding foot - after stretched is fully deformable. Additionally, resistant to sweat, fat and detergents, which increases the comfort and quality of Your life.

**Silver + protection** inhibits the growth of bacterial flora, also one that leads to unpleasant odors.

Maintains the freshness of socks, even if they are washed in cold weather, so it is possible to reduce energy costs, they are also resistant to washing and dry cleaning.

## The scale of keeping warm:

Very thin sock, the most common type are sneakers with a very low degree of keeping feet warm.

Thin sock with a low degree of keeping feet warm.

Thickness medium sock, half-terry type with a medium degree of keeping feet warm.
