

REGINAsocks

Branded products Regina characterized a unique softness and flexibility through the use of professional yarns.

Pressure-free cuffs increase the comfort, directly affecting on the user satisfaction.

Additionally reinforced zones on toes and the heels to lengthen the life of the product.

Available materials:

Combed cotton - soft without impurities, perfect for summer knitwear.

Brushing is a process in which cotton is deprived of impurities, nodes, and short fibers whereby achieves a smooth and supple cotton.

Polyamide, due to its characteristics - lightness, strength, resistance to creasing, easy washing and fast drying is a popular material used for the production of socks. As used in the form of microfibers has a very high flexibility, juiciness of colors and a pleasure to touch.

Material is very resistant to bacteria and fungi.

The product is based on the original fiber of the **Lycra** brand.

Lycra socks ensures a perfect fit to any, even the most demanding foot - after stretched is fully deformable.

Additionally, resistant to sweat, fat and detergents, which increases the comfort and quality of Your life.

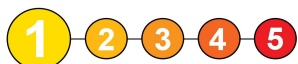

Thanks to using the **Purista** measure, which allows the control over the development of bacterial flora and the associated odor socks stay fresh for a longer time (up to 50 washes). It gives you confidence and makes the persons wearers of socks with a sign **Purista** will feel clean and surely for a long useful time.

The **Prolen Siltex** is a fiber modified with an antibacterial biogenic silver ions.

This measure inhibits the growth of bacteria, mold and mildew. Reduces unpleasant odor, keeps the biological balance of the skin and ensures the freshness of products, fulfilling his task, even after repeated washing.
